Some Critical Actions For The Success Article Community

My write-up network is a revolutionary back link developing and web site content material creation program. It definitely makes some bold claims that I wanted to investigate just before investing too much of my time into it. I was burnt by a similar mass write-up distribution program 6 months ago - along with the web-sites I employed have still not recovered from the Google slap. At my experiments I discovered how you can get the most effective outcomes and this is what I'm going to give out in this write-up.

What's My Article Network?

My write-up network is an automated write-up distribution program built on a enormous network of over 10,000 high quality blogs. I guess you could call it write-up two.0 submission. You create an write-up, which you enter into the program and is then automatically distributed inside of a Google Friendly fashion to related blogs. The finish result is your web site receives a controlled amount of backlinks from relevant web-sites over time which increases its rank within the search engines. The flip side of this is that you simply can also submit your web site to receive these articles - this is also a fantastic concept but not the outstanding function for me.

Vital Step 1 - Relevant Category

From my tests choosing a relevant particular category is essential. It's no surprise that Google will give far more weight to a backlink from a relevant web site - so it makes sense to pick essentially the most particular category offered. Don't be concerned my write-up network as a enormous list of nearly 100 unique categories to choose from.

Vital Step 2 - Spin Your [Magic Article Rewriter Coupon](#)

The most impressive function of my write-up network may be the capacity to spin or re-write your articles. This is absolutely essential to obtain maximum impact from write-up distribution. If Google sees the write-up as been unique (even slightly) it'll give far more weight towards the backlink. There is certainly a manual and automatic rewrite function which is actually effective. From my tests I suggest rewriting the write-up 1000% - this indicates giving 10 alternate titles. Further to this I strongly advise you rewrite the physique 200% - this equates to two alternate sentences for each and every sentence. This can take approximately 20 minutes for a 500 word write-up. Trust me when I let you know its the most effective 20 minutes it is possible to invest within your write-up. At the finish of the day the far more re-writing you do on your write-up the superior

Vital Step 3 - Limit Your Distribution Level

A different robust function of my write-up network may be the capacity to limit the distribution level of your write-up. You can essentially set a maximum limit on the number of times your articles might be distributed. From my test and knowledge you don't wish to distribute far more than 30 - 40 copies of the 1 write-up when you follow the above tip concerning spinning your write-up. Further to this it is possible to gradually increase your distribution level over time so it is possible to continually drip feed your content and guarantee they remain as Google Friendly as doable.

Vital Step 4 - Don't Include Far more Than two Backlinks

Now the creators of my [Magic Article Rewriter](#) say that you simply can contain up to three backlinks within the 1 write-up. I disagree with this once more from knowledge. The complete purpose of the write-up is to have anchor text backlinks to your web site accomplished by way of relevant key phrases. It has been shown Yahoo and Google will rarely give weight to any far more than 1 - from time to time two links from the 1 write-up. Any far more than this can from time to time be read as spam, and you don't end up acquiring the energy from the backlink as you normally would. Further to this I advise that you simply pick to contain two anchor text links, make certain they're by way of unique keyword phrases - even if its a little plural version - make certain they're unique.
